$451+3$ tens $=481(5+3=8)$
$451-4$ tens $=411(5-4=1)$
Crossing 10s (Exchanging)

$$
258+80=338
$$

- Column method
- Count in 10 s mentally
- Add 100 , subtract 20

## Estimate and Check

Add and Subtract 100s

3 digit numbers

## Crossing 10 and 100

$$
\begin{array}{rrl}

| Word | definition |
| :--- | :--- |
| add <br> total <br> plus <br> sum <br> more <br> altogether | Bringing two or more <br> numbers (or things) <br> together to make a new <br> total |
| subtract - <br> difference <br> less minus <br> take away | Taking one number away <br> from another. |
| column <br> addition | Addition by writing one <br> number below the other <br> and then adding one <br> column at a time <br> definition |
| column <br> subtraction | Subtraction by writing one <br> number below the other <br> and then subtracting one <br> column at a time |
| exchange | Change a number for <br> another of equal value. |
| estimate | To find a value that is close <br> enough to the right <br> answer, usually with some <br> thought or calculation <br> involved. |
| operation | Inverse means <br> the opposite in effect. The <br> reverse of. The Inverse of <br> Adding is Subtracting |
